Longfellow's Greenhouses

Tricolor Willow (tree form)

Salix integra 'Hakuro Nishiki (tree form)'

Height: 8 feet

Spread: 6 feet

Sunlight: ○

Hardiness Zone: 3

Other Names: S.i. 'Albomaculata', Dappled Willow

Description:

One of the showiest small trees for foliage color, new growth emerges soft pink and white, literally bathing the plant with color in spring, fades to white variegation in summer; should be pruned every winter for maximum effect; tough and adaptable

Ornamental Features

Tricolor Willow (tree form) has attractive white-variegated green foliage with hints of pink which emerges pink in spring on a tree with a distinctive lollipop-like form. The narrow leaves are highly ornamental but do not develop any appreciable fall color. The smooth bark and brick red branches add an interesting dimension to the landscape.

Landscape Attributes

Tricolor Willow (tree form) is a deciduous tree, selected and trained to grow in a small tree-like form with the primary plant grafted high atop a standard. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Tricolor Willow (tree form) is recommended for the following landscape applications;

- Accent
- General Garden Use

81 Puddledock Rd
Manchester, ME 04351

Planting & Growing

Tricolor Willow (tree form) will grow to be about 8 feet tall at maturity, with a spread of 6 feet. It tends to be a little leggy, with a typical clearance of 4 feet from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This tree should only be grown in full sunlight. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
