Plant Height: 18 inches

Flower Height: 24 inches

Spread: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Wild Columbine, Granny's Bonnet

Description:

Showy, upward facing rose and pink flowers, featuring white cups and long, graceful spurs rise above bushy, deep cut foliage; a great long lasting cutflower; good for naturalizing partially shaded areas, and is also deer resistant

Ornamental Features

Kirigami Rose and Pink Columbine features bold nodding pink bell-shaped flowers with white overtones, yellow eyes and rose spurs at the ends of the stems from late spring to early summer. The flowers are excellent for cutting. Its deeply cut ferny compound leaves remain green in color throughout the season.

Landscape Attributes

Kirigami Rose and Pink Columbine is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Kirigami Rose and Pink Columbine is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Naturalizing And Woodland Gardens

Planting & Growing

Kirigami Rose and Pink Columbine will grow to be about 18 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 6 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
