Height: 24 inches

Spread: 24 inches

Sunlight: ○

Hardiness Zone: 4

Group/Class: Snippet Series

Description:

This is an extraordinary cultivar that forms a compact rounded shrub with rich glossy green foliage; striking, deep pink trumpet-shaped flowers re-bloom all season and attract hummingbirds; ideal for mixed borders.

Ornamental Features

Snippet Dark Pink Reblooming Weigela features showy clusters of hot pink trumpet-shaped flowers with white anthers along the branches from late spring to mid fall, which emerge from distinctive crimson flower buds. It has green deciduous foliage. The glossy pointy leaves do not develop any appreciable fall color.

Landscape Attributes

Snippet Dark Pink Reblooming Weigela is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Snippet Dark Pink Reblooming Weigela is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Snippet Dark Pink Reblooming Weigela will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
